Χορωδία or Chorodía - A Unique Type of Emanation, Emanationism Applied

Soliloquy I

The chorus too should be regarded as one of the actors; it should be an integral part of the whole, and share in the action, not in the manner of Euripides but of Sophocles. - Aristotle, Poetics

Computer science is the ultimate tool of creative freedom. A writer has a blank word document and an artist has a blank canvas. We as computer scientists have a blank file. - The art of computer science, University of London – Source: https://london.ac.uk/news-opinion/london-connection/feature/art-computer-science

Computer Science is an art of thinking – Quora question, Why is computer science both art and science - Source: https://www.quora.com/Why-is-computer-science-both-science-and-art

A Note on The Form

Note: this is a esoteric but not inner work circulated amongst a particularly darkly numinous Gaelic Druydic Pagan White Nationalist Cult of Shadows which has two associated exoteric forms and esoteric Sinister-Numinous forms as well as a sub-culture based upon the causal abstractions and volkisch κουλτούρα (kulture) or πολιτισμός (cultural ethos) of the continuation of Reichsfolk towards un-extremist pro-technological advancement and ultimately transhumanist and futurist continuation or Gaelic nexion or Tribe presencing not manifestation but perhaps in due time being so. And was perhaps noted by at least one former alleged associate of the Omega9Alpha whom was the last outer rep and a gay Asian woman to manifest the Culture of Arete or excellence. And whose early form that of Sinister-Numinous Gnostic Fascism was said to have been in the very least on the mark.

A more mathematically correct model based upon the Star Game was presented to various academicians who research artificial intelligence, networking and other aspects of theoretical computer science and ethical philosophy of computing itself. The individual author who wrote this article shall remain nameless but is deciding whether or not to research these ideas in private and pursue an academic education then vocation and tenure-ship in humanities, philosophy or computer science itself. And debated whether or not his completed degree should be considered a bachelor of science or a bachelor of arts. As via such abstract reasoning he was able to transcend both in a very Sinister-Numinous way via shapeshifting and using forms to weave and disguise the true esoteric meaning behind it which is hinted at in this work but not given away except to only those few individuals who are adepts, Masters, Mistresses, Grandmasters and Grand Ladies of the original Hebdomian Way and manifest the dark with their Baeldracian Tribes who are indeed very darkly numinous, Sinister and dangerous to the unaware mundane or hubris individuals of the police force who seek via a tyrannical War on Drugs, War on Terror and now War on Free Speech to end the existence of the white race once

and for all via instating a 1984-esqe thoughtcrime based society that only those who exist in a vegetative state or via inaction make themselves now and forever known as traitors and deserving of the noose at during the day of the rope. They are primarily incapable of change either conscious or unconscious and have become akin to animals which walk up-right. That is to say that the modern human is no longer that misaptly named species of Homo Sapien but that of the White Hordes of Homo Hubris who follow a very patriarchal male hubris ethos of “might is right” with the mindset of the bully or those individuals who have become as a result actual predators and Vampiric due to evolving to prey upon such weak minded simple individuals. And here we cannot say due to their lack of innocence they are undeserving victims. Indeed if they should rape their women, slaughter their children, and burn to ashes their cities or towns then it is due to the hubris of the Homo Hubris and the inability of the mundane type of human – the sudra or lower still the sixth form man – to evolve out of sheer laziness, cowardice, lack of will or understanding. Some occultists for example erroneously have assumed that the Tree of Wyrde is nothing more than an “Aryanized” Kabbalah or that the original Hebdomian Way was based upon Aleister Crowley’s system of Thelema or the Hermetic Order of the Golden Dawn etc. And those who were formerly following the way of the Satanist or National Socialist (usually both as Satanism is the esoteric form of National Socialism and National Socialism is the exoteric form – both in Nietzschean sense follow master-morality and place an emphasis on honour, nobility, courage, self-overcoming, Faustian or Promethean quests to obtain forbidden knowledge, etc. And would have lead to the creation of the Galactic Imperium via conquering the world establishing a one-world National Socialist government which would be based not upon race but folk or *volk* and have the Pagan ethos not Christian once based upon the Jewish deception Christianity which was created as some Satanic adepts believe during their time spent as slaves in Rome ie the Original Nazarene Distortion where a Council decided what was and was not Christianity and this became Catholicism which many modern Christians label as Pagan or heretical now suggesting that Catholicism is indeed becoming a new Aeonic form in itself perhaps).

For an elaboration on this I recommend one consult the O9A MSS: *Hysteron Proteron* which is available in limited order with a foreword and few appendices ie Beyond the Dialectic, note extracts from the Black Book of Satan, etcera as well as some now unavailable Satanic works by the Misanthropic Luciferian Order (which was Gnostic Fascism esoterically), the Tempel ov Blood, and others. And is a compliment to the Sinistar-7 Syndicate’s *Kaosdrache* work. With an apolitical work based upon but primarily inspired and influenced by The Deofel Quartet, A Sinister Sport, and Eulilia: Dark Daughter of Baphomet, Which had the first two parts published online with the online versions being partially encrypted and scattered around but still incomplete, a very censored version of them under a different name and author, early drafts, etc. As well as works influenced by Sophocles and Sappho. And a fictional modernized account of what would happen if a figure like Adolf Hitler rose again today written in a play format such as Beowulf or the Iliad primarily as a play in two parts with operatic elements and science fiction and dark fantasy elements as well as influences from literary depictions of the accounts of war in history such as the Battle of 300, the Campaign in Russia, the Storm of Steel, and also presents an Islamic and East Asian ally. With the resulting destruction of Africa, the Indian subcontinent and the Mediterranean where individuals of the Magian ethos watch their own empire fall which there being elements of literal allegory to the fall of the Hellenic civilization via it becoming the decadent Roman Empire which became Christianize and conquered

Albion. The second part is a very Bhagavad-gita and Faustian-Alchemical surreal work. And there is a running influence from the manga Berserk in both and a nod to the Iron Gates in both a disapproving yet homage fashion. And some more conventional Sinister fiction as well based upon Vampirism. This should be left out of this work but here I keep it in for historical purposes and as a reminder to an old friend of mine to not lose their way. This old friend is my own soul.

Outline

I envision a de-centralized peer-to-peer network that encrypts the user's personal private information or more specifically would generate a 16-digit or n-digit alphanumeric hashcode based upon hexadecimal from the user's IP address – which has been used maliciously at times by attackers as a means to identify the geolocation of an individual and when stored in databases is usually logged by a system whereupon police and police counterintelligence agencies for example on the basis of suspicion oftentimes without a warrant or even via backdoors willingly put into such networks by the developer themselves legally and use it to publicly identify an individual or via their ISP do so whereupon they can seize the electronic devices of a person at least in Canada and the EU upon suspicion of promoting hate or genocide online. Which has come to mean anything that the government feels that people are forbidden from thinking and under the Canadian Charter of Rights & Freedoms there is no exceptions made for said speech. That is to say if something is judged by a police officer, police agency, corporation or someone who has access to this information either due to the system itself being insecure or unconcerned with said access or is as stated done illicitly. And this is not to ensure that the general population is safe but to enforce upon the individual user of the system a moral or ethical code that is not considered *good* because it is good but because the government and individuals it has some would say brainwashed – whether or not this objective reality is irrelevant in the interests of free speech as primarily freedom of speech is to be considered *amoral* or as Voltaire would say "I may not agree with your opinion sir but I would fight to the death for you to say it" and as Aristotle would say "It is the mark of an educated man to entertain an idea without accepting it". And created in essence something called cancel culture and led to the rise of violent albeit disorganized but most definitely not de-centralized networks of antifascists such as ANTIFA who are given credence and support by such corporations as McDonald's, Google, tumblr, Reddit, and Twitter.

Here we are not concerned with how others may view this as anti-Semitic (very incorrect word as it has come to mean anti-Jewish or against Judeo-Christian values which some could argue are in fact racially (and if not racially, ethnically or otherwise based then religiously based either via unconscious influences or conscious influences) supremacist in themselves – ie the idea that only Jew's are God's chosen people with everyone else being considered *goyim* or Hebrew for cattle and it Arabs are Semites as well. So to refer to someone as anti-Jewish by using the term anti-Semitic is incorrect. Some may argue that Christianity is not a Jewish religion but Christianity is based upon Judaism and likewise Islam and while many would say that both religions have concepts which could be considered anti-Jewish for the sole reason both being based off or influenced by Judaism moreso with Christianity as the Old Testament is the Torah and Yeshua or Joshua – ie 'Jesus Christ' or the 'Kristos' is seen as the Messiah which would mean that via the exoteric interpretation most individuals have (unlike individuals such as Isaac Newton perhaps esoterically – in some sense I leave it up to the reader to explore Gnosticism which was in fact Neo-Platonism and Hermeticism – but Newton did not view Jesus as God) that a Jew is the "King of Man" and "Son of God" and also "God the Father" and the word *logos* – which originates from an earlier Greek concept likewise with gnosis and the reader can find this in the Corpus Hermeticum. While a lengthy exposition conventionally speaking here why is it

illegal or illicit for someone to not believe that Jews are the superior race of people? And one can argue well Jews see themselves as white – no they do not one just need consult the Babylonian Talmud which non-Jews are forbidden from seeing. Even if a gentile converts to Judaism he or she. Often I use he/man/him/his interchangeably with she/her/woman I am a non-threatening male I do not seek to imply nor cause an implication of inferiority of woman for women are the most beautiful creations in existence to me although the modern woman has become more masculine, patriarchal and the modern male more effeminate – which is an hermetic principle itself ie gender. And based upon polarity and flowing from one opposite to the other it is indeed a totally natural process and via the path of inaction or Wu wei from Chinese culture we can via effortless action recognize this flow and be not the cowardly centrist but beyond both we note the ebb and flow and allow it to drift much like a cloud through the sky of our mind upon reaching the hill where we should remain from following the Sinister and also achieve from following the numinous. There is no real concept of right-hand path because everyone in society as a whole is born right-hand path in today's society although I would argue antifascists have become very Sinister in themselves. That is to say they have become monsters from hunting monsters in a Nietzschean sense. They gazed too much into the Abyss which gazed back into them and before they knew it they were gassing whites and sending "nazis" to concentration camps much like Comrade Stalin sent the evil nazis away but laughably still gassed Zionists and supported the gassing of Jews and was executed by poisoning a very baneful thing to do by some baelful individual. Had Stalin been allowed to continue to be this way no doubt he would be a tyrannical figure as he was before the Doctor's Plot but he would have eventually created the Russian Nationalist state that could of colonized space. So you see Communism – which is esoterically speaking slave-morality that holds the individual with the less amount of value compared to that which is valuable – as an example poor over rich, fat over athletic, cowardly over brave, etc. And which Christianity via it's ethos of the meek inheriting the Earth and it's creed itself being based upon the weakness, frail, diseased, etc. Individuals – Yeshua himself consorted with prostitutes and was said in some cases to have kissed Mary Magdalene on the lips as a lover and who a Jewish Roman said his mother Mary was raped by a Roman Soldier Panthera or Pantherus and passed the child off as the son of God. And to Jews in the Talmud Yeshua is to said to be burning in a vat of stool for claiming to be the Messiah. However, Islam is far more anti-Jewish conventionally speaking than Christianity and Islam likewise does not hold Yeshua as Jesus Christ or the Messiah.

Continuing on the idea of labelling free speech as racist, extremist, homophobic, etc. or allowing such therefore it must be controlled and monitored by governments, corporations, antifascists, Zionists, and others such as Social Justice Warriors, politicians, journalists – and journalists do not seek the truth but a story whether or not they support you or not they are looking to write a story ie not the objective truth in an academic sense and most journalism today is done by plebeian individuals on blogs whose authors were rejected by established Zionist-occupied presses such as The Jew York Slimes (The New York Times), those looking to create some sort of platform or use a platform such as YouTube to either film and document such events in a very biased way as the platform does not support any opinions that are contrary to modern leftism, Zionism or antifascism or cry crocodile tears over such events and capitalize upon it much like Hollywood did with the Shoah. Which those who knew Adolf Hitler very personally such as Leon Degrelle – whose book "The Campaign in Russia" shines a spotlight on the behaviours however ignoble of the Communist who is the modern day antifascist or Cultural Marxist and that of the Waffen-SS who were very darkly numinous and noble fellows and multiracial, multiethnic and diverse religiously. Adolf Hitler allowed Muslim SS members to wear their traditional uniforms. And a lot of these individuals were Balkan or Slavic so to say that you support Russia as it is anti-Zionist at present unlike the Ukraine which seeks to join the EU and supports and models itself after Israel when allegedly Hitler said Slavs were fit to be slaves and yet praised Islam also makes me curious about if you know the history behind a lot of the Third Reich or fell for propaganda against it.

The objective reality is irrelevant but Christians who try to involve themselves in a primarily Pagan continuation of the Hellenic civilization and not the decadent Roman Empire and had the warrior-ethos of the Spartan you are doing a disservice to the cause and are in fact unaware that Adolf Hitler was going to reform and eventually phase out Christianity. What's more as a member of the conservative (at the time) right-wing nationalist Pagan institutions that operated underground such as Ultima Thule. And underlined a sentence in a book on the occult which read "He who does not have the demon seed cannot give birth to an empire" or something similar as well as "Satan is the beginning". This work is called Magic: History, Theory and Practice and will be available for purchase in print or as a PDF via Darkhorse Publishing very soon (https://darkhorsepublishing.wordpress.com/) and yes I am not concerned with it's similarities to Darkhorse Comics here as I do not really enjoy such works of Jewish literature. Which portray National-Socialists as barbaric savages who are the enemy etc. Consider the initial work of DC was done by a Canadian Jew who based it upon a work of literature which portrayed the Nietzschean ideal of the Ubermensch as a barbaric savage killer with superpowers into a man with tights who shows up to deliver Adolf Hitler to the Jewnited Nations itself suggests a very Judaic influence. Likewise it was accused that Batman and Robin were initially or suggested to be homosexual lovers in the 1930-50s or so. And this lead to censoring said comic books to prevent queer degeneracy. There is nothing wrong with comic books myself I enjoy manga which often has a very degeneracy sway by some artists but here why support an organization which don't support you? And Darkhorse originates in my mind from my Irish-British perhaps some Briton or French-Canadian ancestry.

Preamble

This idea may seem like it is far more suited to the realm of humanities and philosophical thought. However, in regards of computing perhaps it can prove useful at times to think in very abstract terms. That is to say here using concrete thinking I must starting initially from a source that is very abstract and based on abstract reasoning ie "the ability to understand and think with complex concepts that, while real, are not tied to concrete experiences, objects, people, or situations." An example here taken from literature and a reference to the above quote in Antigone by Sophocles that conventionally expressed just describe an unfortunate tragic event which can be taken at face value in concrete terms but in abstract terms has a very significant meaning. That is to say concrete thinking we can take things at face value so to speak. And it is very suited to empirical science and rational thinking because these are concerned with an objective reality based on Euclidean geometry of 3 dimensional spatial properties or 3 spatial dimensions ie height, width, and depth and a linear time dimension which provides forwards. An abstract way of thinking could involve non-Euclidean geometry and a time dimension with infinite dimensions ie it would be non-linear. In other words there are two ways of viewing things the outer exoteric view of things and inner esoteric view – the form itself at face value: "there was a tree in the woods" with the other viewing being what was the significance or meaning of the tree being in the woods. And not always does this lead to some sort of deep spiritual meaning but it does lead to a concept called numinosity which is the presencing or manifesting of numen or that which arouses spiritual or religious emotion or can relate to the preternatural again using the example of Antigone to a tragic impersonal fate which was perhaps undeserved and caused by male hubris (conventionally something not evil but *bad and perhaps unfortunate, causing sorrow, suffering, etc. Or in my opinion more aptly something dark which can itself via empathizing with said situation lead us as a species to think in more compassionate, empathetic, or honourable ways instead of in ideologies, -isms or abstractions*) or that which is a very positive illuminating light experience such as entering a Mosque for the first time, reading a work of such as the *Bhagavad-gita,* encountering something mysterious for the first time or making a new discovery via empiricism or conscious thought based on initially something wordless or via *logos* us to experience gnosis, self-insight or self-mastery, experience the guidance of providence itself, etc or via a personal *muse, genius or daemon* to use the

Hellenic or Grecian terms (and it is interesting to point out primarily these figures were muliebral or characteristic of the feminine or portrayed as female or in the Jungian sense the *anima* (which is the unconscious feminine qualities of the male or masculine gender itself more correctly).
So how does all this relate to the idea or ideas of artificial intelligence, we would teach a machine empathy and the numinous.

[THIS COMPLETES PART I OF THIS SERIES OF *μονόλογος or soliloquy*]

Here we give an overview of my exoteric ideas and the definition and elaborations of what is to come further on. In brief conventional terms we are going to create a new "internet" which is peer to peer based de-centralized anonymous and encrypted with a VPN or proxy built in via using or hosting a TOR exit node(s) offshore in Russia, Ukraine, and Romania this network will generate cryptocurrency called chit where a quid at time of writing will be considered one unit of currency tradable for fiat in the form of 1.58 ETH or 0.069 BTC. It awards a percentage of such based upon how novel the content is (similar to the concept of the Robot 9000 from XKCD but less associated with a certain imageboard we won't name) and suggests new content for users based upon their activities similar to how advertisers use cookies and tracking but this is encrypted within the database like how ProtonVPN and ProtonMail does such that even if the database was seized legally or otherwise not even the administrators or developers of that system would be able to de-crypt it. There would be no personal information taken at all and the application would be itself a virtual machine running on top of (and perhaps aim for both) the JavaVM, Python VM and Chrome V8 JavaScript Engine but initially I'd pick Node.js or Python – Node.js is just something I find really neat and clean for some reason. Curiously I would like to develop my own virtual machine based upon V8 to do so making minor modifications as needed or if needed. And develop an implementation of Scheme that would either use Node.js or the V8 engine and grow on this language separately as well as I like to sort of mix together C, Scheme, and Haskell in a very clean minimalist easy to understand language that had a way via backwards compatibility to handle the Python library and Node.js extensions but being LISP-based would be able to have a LISP Machine type VM and be self-modifying even on the user level. And I'd suggest that we use genetic algorithms to guarantee the strength of the system.

Novelty theory is a pseudoscientific idea[10][11] that purports to predict the ebb and flow of novelty in the universe as an inherent quality of time, proposing that time is not a constant but has various qualities tending toward either "habit" or "novelty".[5] Habit, in this context, can be thought of as entropic, repetitious, or conservative; and novelty as creative, disjunctive, or progressive phenomena.[8] McKenna's idea was that the universe is an engine designed for the production and conservation of novelty and that as novelty increases, so does complexity. With each level of complexity achieved becoming the platform for a further ascent into complexity.[8]
